

THE MICHAEL THOMAS GROUP INC.

Construction and Project Managers

September 19, 2011

To whom it may Concern

The Michael Thomas Group provides top quality and cost effective Project and Construction Management service with primary involvement in new and renovated corporate interiors, institutional facilities, and industrial space. We primarily work in the GTA area, however we have completed Projects in Montreal, Ottawa, Thunder Bay and various locations throughout Southern Ontario. Our services extend as far as our Clients requirements.

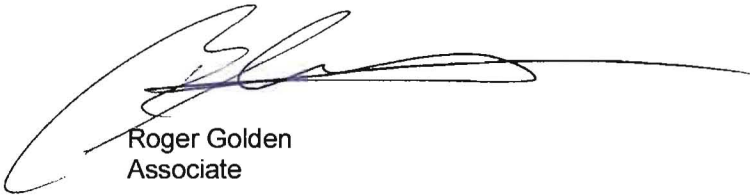

Michael Thomas Group engaged Advanced Buildings Solutions Inc., an associate of ABS Group of Companies in early 2010, on the Alliston District Humane Society Project, to engineer building mechanical & electrical systems, geothermal system, project administration and assist client to receive High Performance New Construction (HPNC) Incentive. ABS Group day to day activities are primarily managed by Mr. Imran Majeed, Chief executive officer of "ABS- Leading Eco-Friendly Group of Companies", with many years of facilities projects experience in Mechanical Engineering, Geothermal Engineering & Green Building Consultancy.

The company displayed the highest degree of professional ability on Alliston & District Humane Society Project and their integrity is without question. The company performed detail design and provided options to increase the overall operational efficiency and reliability of a geexchange system and proposed economical solutions to meet the budgetary requirement, maintain building originality & aesthetics as planned by the architect and come up with unique and innovative energy efficient and environmental friendly solutions that not only satisfy building heating & cooling demands but also allow **zero (0)** use of propane or natural gas for building energy use to achieve Carbon Neutral & environmental friendly status.

I strongly recommend the ABS Group of Companies as a Professional Consulting group which understands not only the Construction Industry and their Clients but also have a willingness to go beyond what has become "just good enough" in the Construction Industry.

We appreciate as does our customer the excellent work & services provided Advanced Building Solutions Inc., & their team on Alliston and District Humane Society Project. I look forward to ABS Group continued support in helping to design & execute our projects.

Yours truly,
THE MICHAEL THOMAS GROUP INC.

Roger Golden
