

## IPS Fan Coil – Belt Drive Series

800 CFM to 12000 CFM

### Horizontal Basic (AH-B)

Housed in a heavy-gauge, galvanized steel cabinet, the Horizontal Basic Belt Drive air handler (AH-B) includes coil, forward-curved, dynamically balanced blowers, motor and drive package. Controls and motors are factory-mounted and provided in a single-point power supply. Access doors are provided on both sides of the unit for easy maintenance.

800 CFM to 12000 CFM

### Horizontal Deluxe (AH-D)

Ideal for applications where a finished cabinet is required, the Horizontal Deluxe Belt Drive (AH-D) is the same unit as our Horizontal Basic model, only finished with a baked-on tough, soft white powder-coat epoxy and subjected to 500-hour salt spray test in accordance with ASTM B117. Access doors are provided on both sides of the unit for easy maintenance. **Also available as Double-Wall (Solid or Perforated).**

800 CFM to 12000 CFM

### Vertical Basic (AV-B)

Also in a heavy-gauge, galvanized steel cabinet, the Vertical Basic Belt Drive air handler (AV-B) includes all the same components as our Horizontal Basic model, only available as a vertical configuration. Access doors are provided on both sides of the unit for easy maintenance.

800 CFM to 12000 CFM

### Vertical Deluxe (AV-D)

Ideal for applications where a finished cabinet is required, the Vertical Deluxe Belt Drive (AV-D) is the same unit as our Vertical Basic model, only finished with a baked-on tough, soft white powder-coat epoxy and subjected to 500-hour salt spray test in accordance with ASTM B117. Access doors are provided on both sides of the unit for easy maintenance. **Also available as Double-Wall (Solid or Perforated).**

Note: Williams Furnace Company® may change the design and product specifications at any time. Contact ABS or the factory for current information.
